

Academic 學術組 TASK 2 申論題(2) Argument Essay 題型示範

以下將對應上篇文章所提到的架構來看我的 assignment.

開頭及結尾段中的主體將會用顏色標出，表示這將是 model template 中應該替換之處。

題目--

In many countries, gay marriage is illegal.

What are the arguments for and against?

Introduction

The tide of gay marriage has ebbed and flowed over the past decade with no end in sight. Seeing that marriage locates squarely at the intersection of law, society and religion, the debate over the validity of homosexual marriage has abidingly been one of the most complicated, obscure and attention-getting issues.

Agree or For

A great deal of people are strongly in favor of the legitimacy of marriage for same-sex couples on the basis of several reasons. **<-Topic Sentence** Firstly, they are convinced that being able to pick the spouse of any gender should definitely be allowed for the fact that "everyone is born equal" despite the discrepancy in sexual orientation. Secondly, homosexuals are frequently believed to be promiscuous, for which results in a high prevalence rate of sexually transmitted diseases inclusive of notoriously intimidating AIDS. Subsuming gay marriage into the institution empowers the legal system to impel those same-sex couples to keep their "being there for each other, no matter in sickness or in health" commitment to only one single person on the strength of ordinance, which sets lawful limitations on the selection of sexual partners to a certain extent as well as provides valid assurance for the mate.

<-Reasons Up to date, a couple of countries or state governments such as Spain, the Netherlands, Denmark and California of the USA have already legitimated homosexual marriage, with Denmark being the very first one to take action. **<-Examples**

Disagree or Against

On the other hand, plenty of folks are opposed to authorizing marriage for same-sex pairs in view of various explanations. **<-Topic sentence** To name a few, for example, there has been an argument "God made Adam and Eve, not Adam and Steve," indicating that the biological and anatomical differences between men and women exist causally, which is apparently for producing offspring to carry on the family name, whereas parents consisting of homosexuals can purely have kids via adoption. **<-reasons** This may lead to the lack of

maternity or fatherhood for those children, which will perhaps bring about personality or gender identity disorders in the future, as what I have observed in a few patients when doing the clerkship in the psychiatry department of Massachusetts General Hospital. <-examples

Conclusion

On account of the complexity, dispute over the legitimacy of gay marriage will affirmably continue to wax and wane in years to come. However, it is needless to say that more supplemental measures, including comprehensive regulations and thorough mental evaluations, are undoubtedly in demand all the same.
